

# Flourish Research Acquires Excel Medical Clinical Trials to Expand Site Network and Therapeutic Expertise

The highly fragmented and fast-growing clinical research site industry represents a ~\$21B global market, where nearly 400,000 studies are conducted annually. With COVID-19 further highlighting the importance of clinical research and trials, the market demands more efficient patient recruitment across a broad range of therapeutic areas and patient populations. This need is driving rapid consolidation in the industry.

Excel Medical Clinical Trials (Excel) is a clinical research site focused on cardiology, liver disease, and related indications in Boca Raton, FL. Since its founding in 2016, Excel has distinguished itself as a clinician owned and operated research site. The company has both the research experience and clinical expertise required to safely conduct top-quality scientific

research, helping Excel develop deep relationships with both sponsor and CRO customers. Excel's site location, therapeutic areas of focus, and expertise made them the ideal addition to Flourish Research's growing platform, which will become a nationwide integrated network of clinical trial sites offering therapeutic area and clinical trial phase diversity.

Crosstree's expertise in both the clinical trial site and pharmaceutical services industry helped the firm advise Flourish Research in identifying Excel as the ideal target to expand its network. The resulting recapitalization will enable Excel to accelerate growth and expand service capabilities allowing Excel to better serve patients, sponsors, and CROs.

**Crosstree helps clients identify optimal transaction partners to accelerate growth and enhance value for all stakeholders.**

## ABOUT EXCEL

Headquartered in Boca Raton, FL, Excel is a clinical research site focused on cardiology, liver disease, and related indications. The Company was founded in 2016 and has established itself as a market leading site in the years since.
