

H.I.G. Capital Acquires Majority Stake in Navitas Life Sciences to Accelerate CRO Growth

The global drug development market is expected to exceed \$70 billion in value by 2025, with more than half of the market's value driven by CROs. As demand for precision medicine continues to grow, so, too has demand for specialized capabilities to support and accelerate pharmaceutical and biotechnology development.

A technology-enabled specialty research organization, Navitas Life Sciences provides functional services and specialized technology such as pharmacovigilance technologies and life sciences data analytics for clients around the world. The company's strong fundamentals

combined with high growth potential made it an attractive acquisition opportunity for H.I.G. Capital, whose global network and diverse experience across healthcare and life sciences makes them an ideal partner to support Navitas' continued growth as a global next generation CRO.

Crosstree helped H.I.G. assess Navitas Life Sciences' strategic growth opportunities and confirm their investment rationale and offer. The resulting acquisition gives H.I.G. a majority stake in a platform at the forefront of drug development innovation with multiple paths to value creation.

Crosstree helps clients evaluate and develop growth strategies that maximize value for all stakeholders.

ABOUT H.I.G CAPITAL

H.I.G. Capital is a leading global alternative investment firm with \$45 billion of equity capital under management, with a focus on the small cap and mid cap segments of the market.
